

Americhem Announces Ground Breaking Event for Plant Expansion Kickoff

MORRISVILLE, Pennsylvania (September 23, 2019) – Americhem, a globally recognized designer and manufacturer of custom color masterbatch, functional additives, engineered compounds, and performance technologies, has announced a ground breaking event for their Morrisville, PA plant expansion kickoff on October 2, 2019.

The 60,000 sq. ft. expansion will include an isolated 20,000 sq. ft. “Clean Compounding” room that will house up to six new compounding lines. This clean environment, coupled with Americhem’s already existing ISO 13485 Certification, Formulation Control, Change Management Procedures and Regulatory Support Documentation, gives Americhem Engineered Compounds unique capabilities to produce compounds that meet the most stringent Medical Device requirements. A new Customer Center is also included in the expansion to facilitate technical meetings.

“We continue to see significant opportunities to grow our existing segments and diversify into new segments.” stated Jim Figaniak, Vice President & General Manager of Americhem Engineered Compounds. “Americhem Engineered Compounds has become a polymeric solution providing leader in the medical industry over the past few years. To continue supporting this growth, our current customers, and influx of new customers, a plant expansion was the next strategic move to make.”

The days schedule will tentatively follow the below plan:

3:00pm- media to arrive

3:15pm- VP & GM of Americhem Engineered Compounds and CEO speech

3:30pm- official dig with team and pictures

3:45pm- one-on-one interviews with media

About Americhem

Americhem is an innovative, technology-driven leader in the global polymer industry. Its foundation is built around delivering Performance, Solutions and Trust through close collaboration with customers seeking to optimize their polymer products. All of the company's products are backed by complete technical support that ensures quality, reliability and value. Americhem operates 11 manufacturing plants and maintains sales offices throughout the world. Central research and development facilities and headquarters are located in Cuyahoga Falls, Ohio.
